

Govind Singh

Bengaluru, India | +91 8788414070 | govind.s9551@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile

Software Developer experienced in building scalable MERN-based applications with advanced AI/Computer Vision integration and PWA support. Worked on high-concurrency backend systems, CI/CD pipelines, and real-time applications across e-commerce and healthcare domains.

Experience

Software Development Intern | Brisons International (*Aug 2025 – Feb 2026*)

- Developed MERN-based PWA supporting 1000+ products with responsive UI
- Reduced catalog load time by 25% through backend and query optimization
- Implemented API workflows for orders, payments, and inventory management

Software Development Intern | Avaxan Pharma (*Jun 2025 – Sep 2025*)

- Developed a MERN-based pharmacy platform for 250+ SKUs, improving catalog load speed by 25%
- Implemented UI/backend workflows and integrated an AI health chatbot for user assistance
- Built backend APIs to handle high-concurrency requests with efficient performance
- Deployed and maintained applications using CI/CD pipelines with Docker containerization

Software Android Development Intern | Egg Bucket (*Apr 2026 -present*)

- Developing a B2B MERN supply-chain system across 15+ nodes, reducing manual inventory by 15% through automated Supabase triggers.

Projects

- **PokéNest – Pokémon Exploration Platform**
Built a PWA-based Pokémon platform with battle simulator and team builder, used by 200+ users
- **Diffie-Hellman Interactive Demo**
Developed a cryptography visualizer featuring 5+ key-exchange algorithms and 3 attack simulations using React, TypeScript, and Web Crypto API
- **Spatiotemporal Semantic Change Detection Platform**
Developing a deep learning computer vision pipeline using a Teacher-Student paradigm to isolate semantic environmental shifts in dual-temporal satellite imagery (t1, t2).
- **RSA Digital Signature with BCT**
Developed a secure digital signing application using RSA-2048 encryption with blockchain-based timestamping for tamper-proof verification
- **LobbyDex- Raid Coordinator Hub**
Built a low-latency orchestration platform supporting 100+ concurrent users with real-time updates under 200ms via Firestore listeners; optimized system performance and data synchronization

Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, C

Frameworks: React, Next.js, Node.js, Express, Redux Toolkit, Socket.io, Python and PyTorch

UI: Tailwind CSS, shadcn/ui

Databases: MongoDB, PostgreSQL, Supabase, Firebase (Firestore)

Tools: Docker, Git, GitHub Actions (CI/CD), Postman, Linux

Concepts: REST APIs, PWA, Web Crypto API, AI/LLM Integration, Blockchain, Razorpay Integration, Computer vision, Deep Learning, Spatiotemporal Modeling

Education

- B.Tech in Computer Science and Engineering, BMS College of Engineering (2023–2027) | CGPA: 8.52
- Senior Coordinator (<CODE/IO>) | ACM Student Chapter Member | Team CodeLocked
- **Coursework:** DSA, DBMS, OS, CN, OOP (Java)

Achievements: Invited Participant, Pokémon World Championship 2025

Certifications: AWS Certified Solutions Architect (2026) | Docker Fundamentals – Coursera (2025) | DSA – PW Skills (2023)

Soft Skills: Leadership, Analytical Thinking, Product Ownership, Agile Collaboration
